February 2004

MOA Project No. 01-11

Draft Design Study Report

The Municipality of Anchorage (MOA) and its consultant engineers at R&M Consultants, Inc., (R&M) have reached an important milestone in their project to extend Northwood Road to link Dimond Boulevard to 88th Avenue. They have studied the design possibilities for this road link, researched existing environmental and utility considerations, considered comment collected from the interested public, and have produced a draft Design Study Report (DSR) to present this information to the Municipality, government agencies, and the public. In addition to the project's background information, the draft DSR presents design alternatives and highlights a preferred alternative. Traffic modeling clearly indicates the need for this project which will result in reducing delay at most area intersections.

Report is now available at
www.northwoodextension.com

What's Happening?

All interested members of the public are invited to attend an Open House meeting (details below) to learn about the project's research findings and discuss all aspects of the design alternatives with the project team. Your comments on the possibilities for road placement, bridging the creek, intersections, and pedestrian/bike facilities will aid the team in the coming design phase of the project.

Come to the Project Open House...

Wednesday, February 4, 2004

5:30 p.m. to 9 p.m.

**Dimond High School Auditoria
2909 W 88th Avenue, Anchorage
See map location on back.**

Persons with a hearing impairment can contact Relay Alaska at their Telephone Device for the Deaf (TDD/TTY) number, 800-770-8973 and they will assist in contacting the project team. We are able to offer, upon request, reasonable accommodations for special needs related to other disabilities.
